

CYBERSECURITY • INFORMATION SECURITY

# Security Without Surrender.

Enterprise-grade protection that works at your speed—uniting technology, education, and governance to secure your data and your people.

Multi-Layer Protection

Unified Platform

24/7 Monitoring

Enterprise Ready

SMB Scalable

HUMAN-CENTRIC

**People + Tech +  
Process**

PREVENTATIVE

**Find & Fix Gaps  
Early**

COMPLIANCE-READY

**HIPAA • PCI-DSS •  
SOX • SOC2**

# Comprehensive cybersecurity for modern organizations

**3SN** protects infrastructure while progressively educating teams—reducing risk from both technical gaps and human error.

## Outcome: Reduce breach likelihood

Improve visibility and resilience across endpoints, users, and policies.

- Multi-layer protection
- Continuous monitoring & detection
- Clear reporting for decisions

## Outcome: Security at business speed

Controls designed to enable operations—not slow them down.

- Consumer-grade simplicity
- Scales from SMB to enterprise
- Partnership that matures over time

**The 3SN difference:** Many providers offer technology *or* training. 3SN unites **technology + people + processes** into a single security partnership.

### Multi-Layer Protection

Coverage across endpoints, policies, scanning, and visibility.

### Unified Platform

Centralized management to simplify oversight and response.

### Compliance Made Simple

Support HIPAA, PCI-DSS, SOX, SOC2 governance and reporting.

## OUR APPROACH

# Cornerstones of data protection

Cybersecurity requires a holistic approach that addresses people, technology, and process together.

### Education

Reduce risk by strengthening everyday security decisions.

Human error remains a leading cause of security incidents across industries.

### Privacy

Protect sensitive data with strong technical controls.

Secure information with modern solutions and encryption practices.

### Availability

Stay operational—even under pressure.

Secure systems and training help prevent ransomware disruption.

### Compliance

Turn requirements into repeatable governance.

HIPAA, PCI-DSS, SOX, SOC2—made easier to manage and communicate.

**Takeaway:** Effective security is not a single tool. It's a system that combines controls, culture, and governance.

## METHODOLOGY

### The 3SN 3-Prong Approach

Build a culture of security awareness while continuously improving technical defenses and policy alignment.

#### 1) Technical Cybersecurity

Find problems before criminals do—vulnerability scanning, ethical testing, and monitoring.

#### 2) Cybersecurity Education

Practical training to reduce risky behavior and strengthen day-to-day decision making.

#### 3) Governance & Policy

Policies and repeatable processes that support compliance and accountability.

### What makes us different

Most Companies	3rd Stone Networks
Technology only <b>or</b> training only	<b>Technology + People + Processes</b> working together
Sell products and disappear	Build security partnerships that grow stronger over time
Reactive—fix problems after they happen	<b>Preventative</b> —stop problems before they occur
One size fits all solutions	Security ecosystems that scale with your environment
Technical focus and jargon	Human-centered approach with clear reporting

**Professional methodology:** Certified ethical hackers use the same techniques as criminals—then report vulnerabilities instead of exploiting them.

## PLATFORM

# Security that empowers

Enterprise-grade protection with consumer-grade simplicity—choose tools that fit today and scale for tomorrow.

### Console

Central Management Hub

Your command center to monitor, manage, and respond to threats across your organization from one interface.

- Real-time threat monitoring
- Unified policy management
- Automated incident response
- Compliance reporting

### Training Portal

Strengthen user behavior through practical, human-centered cybersecurity education.

### Endpoint Client

Protect devices and users with scalable endpoint coverage aligned to your policies.

### Scanner

Identify vulnerabilities early through continuous discovery and remediation workflows.

### Proxy Platform

Support secure access and enforcement—designed for growth and enterprise needs.

**Business benefits:** single pane of glass visibility, centralized threat management, zero-trust readiness, and scalable deployment.

## BUNDLED OPTIONS

### Recommended packages

Use these bundles as a starting point—then tailor coverage to your industry and risk profile.

#### Essential Protection

Console + Endpoint Client for core security coverage.

#### Complete Security

All products + Training Portal for comprehensive protection.

#### Enterprise Scale

Custom deployment with Scanner + Proxy Platform.

#### Engagement model

Start with a consultation to define scope, compliance needs, and timeline—then roll out with measurable milestones.

#### What you receive

- Clear assessment and reporting
- Recommended controls and next steps
- Ongoing monitoring and improvement

**Need help choosing?** Email [contact@3sn.com](mailto:contact@3sn.com) and we'll recommend the right package.

## USE-CASES

### Industry-specific solutions

3SN understands the cybersecurity challenges different industries face—solutions are tailored to regulatory requirements and threat landscapes.

#### Healthcare

Protect PHI, medical IoT devices, and patient safety systems.

#### Financial

SOX compliance, transaction security, and fraud prevention.

#### Manufacturing

Protect trade secrets, OT, and production continuity.

#### Legal

Secure client confidentiality and digital communications.

#### Retail

PCI DSS, customer data protection, POS and e-commerce security.

#### Education

FERPA, research data protection, and ransomware resilience.

---

#### Compliance made simple

Communicate your program with confidence and reduce audit friction: HIPAA, PCI-DSS, SOX, SOC2.

## NEXT STEPS

### Ready to secure your business?

Let's discuss how 3SN can protect your organization with a comprehensive approach tailored to your industry.

#### Start a conversation

Request a consultation or a demo. We'll align scope, timeline, and compliance requirements.

**Email:** [contact@3sn.com](mailto:contact@3sn.com)

**Website:** <https://site.3sn.com/>

Optional: place a QR code here linking to your request form.

#### Suggested next actions

- Request a consultation (scope + compliance + timeline)
- Request a demo (platform + management console)
- Map your compliance needs (HIPAA, PCI-DSS, SOX, SOC2)
