3rd Stone Networks (3SN)

Security Without Surrender

3rd Stone Networks

Simple cybersecurity for businesses that want to protect what matters—without confusing terms or slowdown.

What we do (in plain terms)

- **Find what you have:** devices, cloud accounts, and key apps
- **Find what's risky:** check for weaknesses before problems happen
- **Fix what matters:** a prioritized plan (not a scary to-do list)

How we help (4 parts)

1) Security basics
- Inventory devices, computers, and cloud accounts
- Run security scans (inside and out)
- Extra login protection (a code on your phone)
- Stop "fake sender" email scams
- Monitoring + emergency response plan

2) Team training
- Short training by role (execs, finance, staff)
- Practice spotting scam emails + coaching
- Quick monthly mini-lessons
- Completion tracking + simple reporting

3) Policies & routines
- Simple risk review + kickoff plan
- Core policies (access, data handling, logins)
- Incident plan + practice drill
- Backups + restore testing basics

4) On-demand help
- Ransomware / account takeover support
- Breach investigation ("what happened")
- Cloud / Microsoft 365 hardening

What you get: a clear roadmap, priority fixes, and easy-to-read updates you can share with leadership.
