Scalable

## Our Approach

# Our Cornerstones of Data Protection

We believe cybersecurity requires a holistic approach that addresses people, technology, and processes together.

## Education

Set your staff up for success with vital knowledge about digital safety and best practices. Human error remains a leading cause of security incidents across industries.

## Privacy

Assure all your sensitive data and information are secure with cutting-edge technical solutions and encryption.

## Availability

Critical training and secure systems prevent ransomware from locking up your data. Stay operational 24/7.

## Compliance

Our Methodology

## The 3SN 3-Prong Approach

We believe that cybersecurity should never be an afterthought. Our comprehensive approach creates a culture of security awareness within your business.

### Technical Cybersecurity

Find problems before criminals do

Our cybersecurity experts conduct regular vulnerability scanning to find and remediate problems before criminals exploit them.

- ✓ Ethical hackers test your defenses
- ✓ Detailed reports show exactly where you're vulnerable
- ✓ Fix gaps before they become breaches
- ✓ Continuous monitoring and threat detection

### Professional Methodology

Our certified ethical hackers use the same techniques as criminals but report vulnerabilities instead of exploiting them. Regular testing ensures your defenses

evolve with the threat landscape.

## What Makes Us Different?

### MOST COMPANIES

- ✗ Technology only OR Training only
- ✗ Sell products and disappear
- ✗ Reactive – Fix problems after they happen
- ✗ One size fits all solutions
- ✗ Technical focus and jargon

### 3RD STONE NETWORKS

- ✔ Technology + People + Processes Working Together
- ✔ Build Security Partnerships that grow stronger over time
- ✔ Preventative – Stop problems before they occur
- ✔ Security ecosystems that grow stronger over time
- ✔ Human centered approach

## Security That Empowers

Enterprise-grade protection with consumer-grade simplicity. Choose the tools that fit your needs today and scale for tomorrow.

TOOLS THAT FIT YOUR NEEDS TODAY AND SCALE FOR TOMORROW.

## Console

Central Management Hub

A central hub for organizations, memberships, roles, and product access across the 3SN ecosystem.

### ✓ Key Features

- Organization & role management
- Memberships and entitlements
- Unified product navigation
- Audit-friendly activity history

### ☆ Business Benefits

- ✓ Clear org boundaries
- ✓ Consistent access patterns
- ✓ Streamlined onboarding
- ✓ A calmer starting point for ops

**Not Sure Which Product You Need?**

### **Essential Protection**

Console + Endpoint Client for core security coverage

### **Complete Security**

All products + Training Portal for comprehensive protection

### **Enterprise Scale**

Custom deployment with Scanner + Proxy Platform

**Expertise**

## **Industry-Specific Solutions**

We understand the unique cybersecurity challenges facing different industries. Our solutions are tailored to your specific regulatory environment and threat landscape.

## Healthcare

Protect patient data and medical devices with comprehensive security solutions designed for healthcare regulatory requirements.

### KEY CHALLENGES

- Protected health information (PHI)
  - Medical IoT devices
  - Regulatory compliance
  - Patient safety systems
- 

## Financial

SOX compliance and transaction security. Financial data requires specialized protection measures and regulatory compliance frameworks.

### KEY CHALLENGES

- Transaction security
  - SOX compliance
  - Customer financial data
  - Fraud prevention
- 

## Manufacturing

Protect trade secrets and operational technology from attacks that can shut down production and cost millions.

#### KEY CHALLENGES

- Trade secret protection
  - Operational technology (OT)
  - Supply chain security
  - Production continuity
- 

## Legal

Attorney-client privilege extends to digital communications. Bar association requirements for digital security are increasing.

#### KEY CHALLENGES

- Client confidentiality
  - Case management systems
  - Digital communication security
  - Regulatory requirements
- 

## Retail

PCI DSS compliance is mandatory for credit card processing. Customer data breaches destroy trust and revenue.

#### KEY CHALLENGES

- Payment card data (PCI-DSS)
- Customer personally identifiable information

- E-commerce platforms
  - Point-of-sale systems
- 

## Education

FERPA protects student records. Schools are increasingly targeted for ransomware attacks that disrupt learning.

### KEY CHALLENGES

- Student records (FERPA)
  - Research data protection
  - Remote learning security
  - Limited IT resources
- 

## Don't See Your Industry?

Our cybersecurity expertise spans across industries. Contact us to discuss your specific security needs and how we can help protect your organization.

# Ready to Secure Your Business?

Let's discuss how 3SN can protect your organization with our comprehensive cybersecurity approach tailored to your industry.
