

PROFESSIONAL SERVICES

Protect Deal Value Before You Sign

60% of M&A transactions involve material cyber risk that traditional due diligence misses.

When a company changes hands, you inherit every vulnerability, compromised credential, misconfigured system, and compliance gap—whether disclosed or not. The average cost of a data breach in 2024: \$4.88 million.

Traditional IT due diligence checks if systems work. We check if they're liabilities.

No commitment. Just a conversation about your transaction.

ASSESSMENT FRAMEWORK

Three Pillars of Cyber Health

Device Security Assessment

Endpoint security, patch compliance, EDR coverage. We verify devices are clean and protected.

Infrastructure Security Review

Firewall configurations, network segmentation, VPN integrity. We verify the network is secure.

Digital Identity Verification

DNS records (SPF/DKIM/DMARC), certificate validation, dark web monitoring. We confirm identity integrity.

\$4.88M

Average data breach cost (IBM 2024)

60%

Not All Cyber Assessments Are Due Diligence

DIMENSION	STANDARD AUDIT	M&A DUE DILIGENCE
Audience	IT/Security teams	Deal teams, boards, counsel
Output	CVE scores, technical	Financial exposure quantified
Language	Technical severity	Materiality, deal impact
Context	Generic posture	Transaction-specific risk
Deliverable	Technical report	Board-ready + deal docs

Deal-aware, not just threat-aware

Quantify risk in dollars

Built for transactions

What You Receive

- ✓ Executive Summary Report (board-ready)
- ✓ Technical Findings Report (severity + financial)
- ✓ Risk Register with prioritized remediation
- ✓ Certificate of Cyber Health
- ✓ Attorney-ready documentation

Why Trust 3SN

Born from decades of cybersecurity frontline experience. Our team has defended mission-critical systems from NASA to enterprise infrastructure. We've seen what breaks, what holds, and what matters.

NIST CSF-aligned methodology. Third-party independence. No conflicts of interest.

"We'll tell you what we can't assess as clearly as what we can. If we don't find material risk, you'll know it's because we looked—thoroughly."
